

“Time to make a change.”

I, **Mugesh Narayanasamy**, would like to request for your support and vote for the position of Board of Governors for the upcoming student body election. I am looking forward in improving existing policies and implement new policies to create an atmosphere that better cherishes the priceless worth, dignity and more diversified learning environment for all the students of our university.

Being a first year Post Bachelorette Student in International Business, I had the opportunity to involve in various clubs and interacting with many students helped me in understanding the difficulties of the students for their academic and professional success. If elected as a member in Board of Governors position, I will do my best to voice out the issues in the general meetings and try to bring out the solutions for the development of the student success.

Having worked as a Team Leader in a multinational corporation allowed me to work not just independently but also in groups. It helped me in recognizing my colleagues’ issues and solved the problem on a regular basis. Working on larger projects helped me to hone key skills such as leadership, critical thinking and risk management.

Students should not leave our university only with a degree but also with the skills and connections needed to succeed in their chosen careers. By regularly posting about job opportunities available, I will establish a community that stays up-to-date with current job scenarios and news. Also, there will be creation of a platform for students to provide feedback on their educational experiences and concerns.

By electing me, you would be electing somebody who strives for excellence, a positive environment and easily approachable when you have suggestions, proposals or any general concerns. Thank you for considering me as your candidate and I look forward to work together where we can make TRU a better place to learn, develop and flourish.

“Someone struggled for your right to vote. Use it.”
